CAB BOOKING PROBLEM

Name: Gaurav Deore
Batch: CV Raman

A mini python project in which I tried to create Cab Booking system with features like booking a cab to do ride car one location to another location etc

Table of contents

Technologies

- Project is created with:
- Python: 3.8.5

Setup

To run this project:

1. Clone this repo.
2. Install Python
3. RUN $cabbooking.py

Output

```
C:\Windows\py.exe                                          [ - ] [ □ ] [ X ]
